PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building responsive, user-facing web applications using React, Next.js, TypeScript, and modern frontend tooling, complemented by working knowledge of Python-based backend development and REST API integration. Skilled in translating UI/UX requirements into clean, scalable code and debugging full-stack issues across the frontend-backend boundary. Strong foundation in data structures, OOP, and the software development lifecycle (SDLC), with proven experience collaborating in agile, cross-functional teams. Eager to contribute to a company as a frontend-focused full-stack developer.

EXPERIENCE

Front End Developer Intern – Equilibrate.AI

Worked for - <https://www.aidashboardbuilder.com/> | <https://www.another-ai.app/>

Jan 2026 – Jun 2026

- Built responsive UI using React, Next.js, TypeScript, Tailwind CSS, and shadcn/ui.
- Diagnosed and resolved API integration issues (GET/POST/PUT) during development, collaborating across frontend and backend teams to identify root causes.
- Developed ADRO analytics dashboard using Apache ECharts for interactive data visualization.
- Implemented lightweight global state management using Zustand to improve performance.
- Contributed to an AI-powered WhatsApp-integrated task manager (reminders, to-dos, sketchpad, tables, AI assistant).
- Built SEO-optimized interfaces, improved UI/UX, and supported testing across modules.
- Leveraged AI development tools to accelerate feature delivery efficiently.

EDUCATION

Nitte Meenakshi Institute of Technology, MCA

Dec 2024 – July 2026

GPA: 9.7/10.0

National Institute of Engineering, BCA

Sep 2020 – July 2023

GPA: 8.0/10.0

PROJECTS

TriMind AI (Final Year Project)

Project Link

- Developed a domain-based AI assistant using typescript, Next.js
- Implemented document-based querying and intelligent response generation.
- Integrated backend logic with data processing and AI-based insights.

Air Drawing

Project Link

- Developed a real-time gesture recognition system using Python and OpenCV.
- Implemented backend logic for processing image data.

Career Mirror Project

Project Link

- Developed a frontend application for an AI-powered career guidance platform.
- Built responsive and user-friendly UI for personality-based career assessment workflows.
- Focused on responsive design, usability, and seamless user experience across devices.

Subscription Tracker

- Built a full-stack web application using MongoDB, Express.js, React.js, and Node.js.
- Implemented Fast APIs and CRUD functionality.
- Designed database schema and managed server-side logic.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, c,

Frontend: React.js, TypeScript, Tailwind CSS, CSS Grid, HTML

Framework: Django, NEXT.js.

Database: SQL, PostgreSQL, RDBMS

Concepts: Fast, RESTAPI Integration, MVT Architecture, CRUD, OOP, Operating systems, software development lifecycle(Agile, scrum)

Tools: Git, GitHub, AI assistant coding (ChatGPT, Claude), Postman API

Networking: Basic TCP/IP, HTTP/HTTPS, DNS awareness

CERTIFICATIONS

- **Python Full Stack Development** - PySpiders, QSpiders , Bangalore
- **Data analytics bootcamp** - Code basics

ACHIEVEMENTS

- 1st place in Web Designing – Inter-College IT Fest (BMSIT, MSRIT)
